REMOTE CONTROL CONSOLES

Benson offers two types of remote time and temperature control consoles which suit most application requirements.

CP4 Is an optimised control console providing secure entry code, temperature dependent start time, time switch with override facility, day and night setback thermostats and switch to enable summer air movement. The console automatically changes between Greenwich Mean Time and British Summer Time. Illuminated neons provide status indication. The console has two levels of security code access. The first level 'user' menu provides time 'on', time 'off' temperature adjustment and one hour extension. The second 'engineer' level allows system changes to the operation settings, temperature differentials, menu codes, screen contrast and optimiser search times.

The CP4 console is fitted as standard to Benson vertical cabinet heaters and supplied in remote format for horizontal, reverse flow and external cabinet heaters. The console is an optional extra for all Benson gas and oil unit heaters and radiant tube heaters.

CP4 Standard supply with all types of cabinet heaters and an option for all gas fired piezo ignition unit heaters.

CP4A An option for automatic unit heaters which includes remote reset indication and switch.

CP4 Is a full function time and temperature control console offering a programmable 7 day analogue time switch, mechanical room and frost protection thermostats as well as summer/winter switching facilities. This manual control console is housed in a robust steel housing.

An optional digital time switch is available.

The CP2 can be adapted for use, where specified, and fitted into vertical cabinet heaters. With Horizontal, reverse flow, external cabinet heaters the console is supplied, where specified, in remote format. With all unit heaters the console is an optional extra supplied in remote format.

With all remote consoles the inter-connecting wiring between heater and console is completed by others.

GUARANTEE:* control panels are covered by a one year on parts guarantee.
